Cost Effective Fire Protection Design

In today's economy all companies are trying to cut cost wherever possible. Q Fire can facilitate these cost cutting measures by providing clear accurate designs, accurate code interpretations and rapid turnaround times.

A fire safety design can range from a simple description of how a building complies with recognized design guidance, to a comprehensive solution for specific design challenges that include detailed fire engineering design.

We work closely with clients, design teams, contractors and regulatory authorities to agree all fire safety goals, identify potential risks and offer options to deliver the most appropriate fire design for construction and operation of buildings.

Q Fire systems extensive industry experience helps us to provide the installation ready fire alarm and firefighting drawings. Our staff has factory trained individuals with most product lines, which gives us the ability to provide innovative, cost effect fire alarm and firefighting design drawings.

Q Fire has a number of designers with extensive industry experience at your disposal which allows you to spend time on running your business, not managing a costly design department. Our services can be a very cost effective way to meet your deadlines without employing additional personnel dedicated to design projects. Since the construction industry is very cyclical your company does not have to spend hard earned capital, and sometimes limited capital, you simply use Q Fire Design's services whenever you desire.

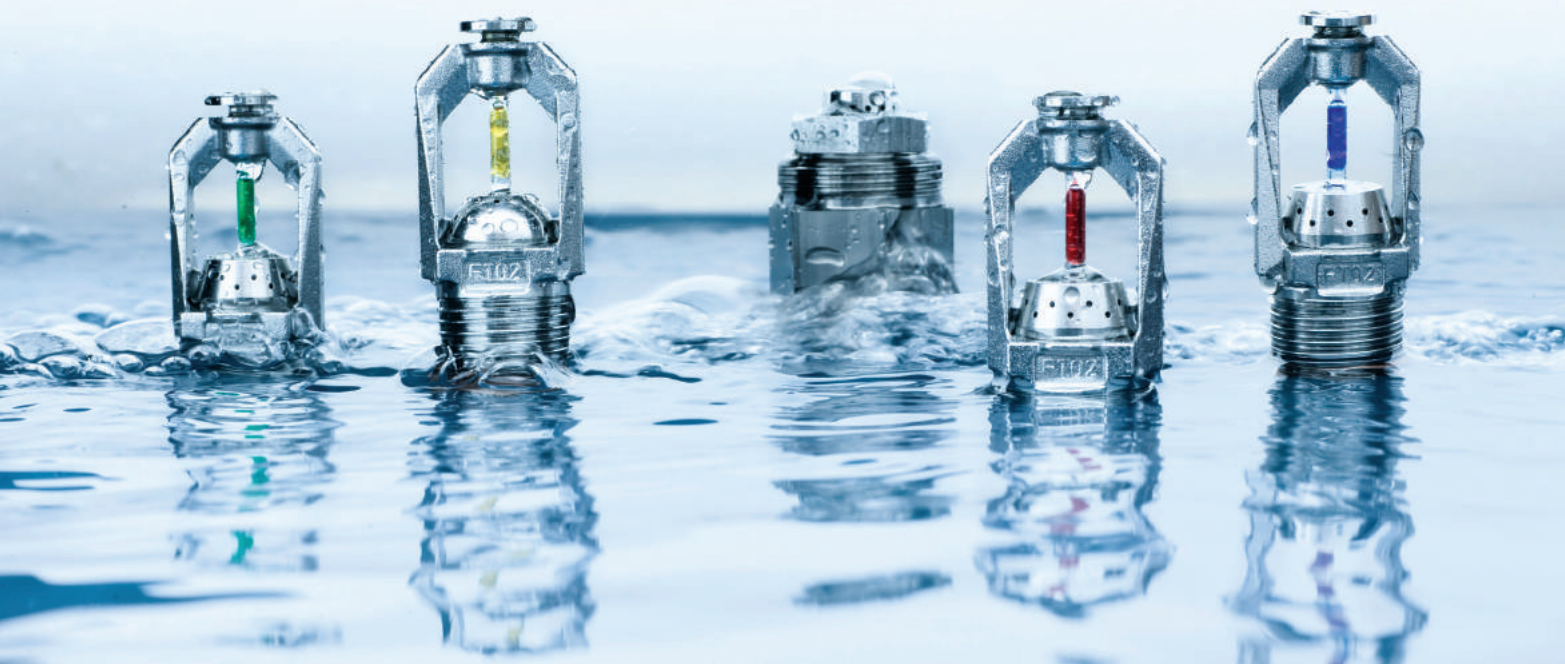

Regulatory Approval

Regardless of the size and complexity of a building, a fire strategy has a crucial part to play in demonstrating compliance with fire safety legislation (e.g. the Building Regulations and Regulatory Reform (Fire Safety) Order) and providing operators with a record of the design. Fire safety design, and the development of an appropriate fire strategy, relies upon understanding the basis of design guidance and the ability to demonstrate that the project complies with local regulations.

We determine the most appropriate design guidance for a project so that it can meet the requirements of those regulations with minimal compromise to the project. If a project does not easily meet the guidance, we draw on technical expertise in conjunction with a wide range of research outlets, to provide pragmatic fire engineering solutions. Since construction is very fast paced we pride ourselves in fast turnaround times to meet your needs.

We Provide Fire System Installation for :

- Fire Alarm Systems - Addressable And Conventional.
- Wet Fire Sprinkler Systems.
- Dry Pipe Systems.
- Pre-Action and deluge sprinkler Systems.
- Standpipe Systems.

Brands We Offer,

Professional Service Immediate Repair Scheduled Maintenance

Our Maintenance and Repair Team is Available

We provide follow through and follow up to ensure that your fire and security alarm system installation provides you with the peace of mind that comes from working with a reliable service partner. Our full-service, fully equipped technicians are experts in the installation of fire protection systems. Because they know how these systems are built, they know better than anyone how to repair and maintain them.

We work hand-in-hand with owners, architects, general contractors, and other trades to ensure that your fire protection, and/or suppression systems, are integrated within your facility in a manner that does not interfere with the aesthetics of construction, and other building components. We accomplish this through collaborative project management, and 3D BIM coordinated design. Our proactive system installers use their solid project management and administration skills so that you can rest easy knowing that your system will be installed to high standards.

When you need experience, we have it covered

With Annual Maintenance from Q-Fire, you'll have access to latest upgrades and other important benefits so that you can continue to solve your toughest safety interoperability challenges.

The Fire protection system is quite possibly the most important aspects of any building structure. Most fire protection systems will have a productive lifespan however these systems can last much longer and continue to provide dependable service with proper maintenance and care.

The requisite testing and inspection that must be conducted to ensure the continued operation of these systems is often seen as time consuming and unnecessary expense, however no one can tell if a fire system is operational by merely looking at it or by performing a superficial check.

It is necessary to implement and adhere to a thorough test and inspection maintenance program for all fire alarm and firefighting system to ensure continued protection and peace of mind for building owner, knowing that he has fulfilled his obligation to his tenants.

Here at Q-Fire our dedicated Service & Maintenance Division have the capability to provide you with a service & maintenance package, which is tailored to your individual requirements.

We can provide you with fully compliant service for any, or all of the fire equipment's/systems including fire alarm, firefighting, fire extinguishers refill and repairs.

When you have a Maintenance Contract with Q-Fire you have one point of contact for all of your various systems, regardless of your location/s in the Qatar.

Q-Fire also provide a 24 hour emergency call out system, with mechanical & electrical engineers on standby 365 days a year to ensure minimum down time for your systems in the event of an emergency. All service contracts are carried out in accordance with the latest Civil Defense standards and rules, where applicable.
